IATAS.aero

AAECS   Emergency Coordination System

AAECS efficiently synchronizes between all airside emergency crews during emergency situations.

FEATURES AND BENEFITS
• Synchronizes between all involved personnel and multiple crews for different scenarios
• All personnel and vehicles are equipped with an airport dynamic map
• Each vehicle has fastest airside routing, procedures, MANOPS and holding positions
• Wrist-map displaying data, procedures and tasks for each personnel
• Seamless integration with SMGCS Level 4 systems for complete automation (AAATCS)

OPTIONS
• Digital voice communication without the need for additional radio infrastructure

SUPPORT
• 24/7 real-time support via the IATAS International Operations Center (IOC)

SUPPLY / DELIVERY
• Normally installed 6 months after AAATCS installation
• Complete hands-on pre-delivery training
• Full hands-on training after delivery
• Ongoing training on periodical updates / features
• Complete printed and online guide, documentation and operational reference
