

AVCOMS Airside Vehicle Coordination & Slotting

AVCOMS keeps your airport runways operational and at capacity, while automatically coordinating maintenance work and assets. Schedule full and partial runway FOD scan, snowplowing, rubber removal, lights intensity checks and the like.

FEATURES AND BENEFITS

- Runways can remain fully operational and near-capacity
- Intuitive interface for AOC and ANSP's
- Maintenance personnel visual airport map allows full situational awareness and interaction over a vehicle-attached and personnel wrist-based PDA
- Set-and-forget, preschedule repetitive tasks
- Seamless integration with SMGCS Level4 systems for complete automation (AAATCS)

SUPPORT

- 24/7 real-time support via the IATAS International Operations Center (IOC)

SUPPLY / DELIVERY

- Turn-key and preconfigured out of the box for immediate use
- Delivery within 4-6 months
- Complete hands-on pre-delivery training
- Full hands-on training after delivery and ongoing training on periodical updates
- Complete printed and online guide, documentation and operational reference
